

# Sensors for Pneumatic Cylinders

Product overview – BMF magnetic field sensors

**more added value**

## more added value

### Reliable, wear-free position detection on all pneumatic cylinders

Magnetic field sensors are used chiefly for monitoring the piston position on cylinders and grippers. The sensor detects the field from the magnet embedded in the piston.

Thanks to non-contacting position detection, electronic magnetic field sensors from Balluff function reliably and without wear, with no contact erosion, no bouncing, no sticking and just one switching point.

The piston position is reliably detected even at high traverse speeds.

➔ **Increase function reliability and uptime for your machines**

### Mini-sensors for mini-actuators

Balluff offers ideal solutions for short-stroke cylinders and mini-grippers. The mini cylinder switches from Balluff are among the smallest on the market and have a highly precise switching point. The sensor achieves maximum precision, even over short switching distances!

➔ **Better integration options**

### The right sensor for any cylinder

Virtually any cylinder size and manufacturer can be covered with the small number of designs as well as fastening and mounting materials. A special sensing element means Balluff sensors can be used on any cylinder from virtually any manufacturer.

➔ **Reduced costs: fewer types for universal use**

**New:**  
 BMF 235 – the standard  
 for every T-slot  
 Page **6/7**

### Sensors with mounting system or compact sensors

Which sensor is ideal for your application?

	Sensors with mounting system	Compact sensors
Would you like to use just one sensor for a variety of cylinder types?	<input checked="" type="checkbox"/> Reduce type numbers – one for all!	<input type="checkbox"/>
Do you need to ensure quick and easy changeout of sensors?	<input checked="" type="checkbox"/> Switching point remains the same	<input type="checkbox"/>
Do you always use the same standard cylinder type (T- or C-slot)?	<input type="checkbox"/>	<input checked="" type="checkbox"/> Simple to install, compact

**Our standard sensors with unique mounting system**  
 BMF magnetic field sensors with unique mounting system have a captive switching point and are extremely versatile.

**Compact sensors**  
 Sensors with integrated holder feature compact design and ease of installation.

# Standard Sensors for Pneumatic Cylinders

Flexible position detection with our standard sensors and the unique mounting system

## Captive switching point

- The switching point is set just once and remains intact even when replacing the sensor.
- Simplest replacement of sensors, with no readjustment necessary.
- Increase the function reliability of your equipment. Replacement is significantly easier and more secure even at inaccessible locations.

## One for all

- By selecting the right mounting bracket you can adapt these sensors to virtually every pneumatic cylinder.
- All-purpose types reduce costs and save storage space.
- BMF 303 system for miniaturized actuators
- BMF 305 system for larger actuators
- BMF 103 system for use on mini-grippers and in short-stroke cylinders.

## Customer-specific solutions

**Mounting bracket + sensor  
+ installation  
= package**

- You require a constant supply of products.
- We will deliver the right combination already assembled, on request.
- Any cable length is possible.

<sup>2)</sup> Addition of the HW-51 with the HW-60

for fastening the sensor next to the slot. This lets you attach two sensors to the cylinder even when space is tight.

2x HW-51 + 2x HW-60 or 2x HW-51 + 1x HW-60

# BMF 235 – the new standard for every T-slot

**more added value**

**Ultrabright LED**

- **Reliable detection of switching function from far away (25 m in bright factory building)**

**New mounting concept**

- **Solid hold in the slot, sensor cannot be wrenched from the slot.**

**Knurled screw**

- **Sensor screws in firmly, extremely secure hold in any slot (e.g. Parker, Festo, SMC, Bosch)**

**Minimum length: 23 mm!**  
8 mm shorter than previous model!

- **Can also be used in space-critical applications**

**Can be installed from above,  
easy to install  
with hexagon socket or  
slot screwdriver**

# Sensors for Pneumatic Cylinders

Position detection with compact sensors for T-slot

Series	<b>BMF 307</b>		<b>BMF 235</b>	
Dimensions in mm (LxWxH)	4.4x6.2x29		5.5x5x23.5	
Unique features	<b>Secure hold in the slot</b> – Design is adapted to the slot. – Also available as reed switch		<b>The new benchmark for the T-slot</b> – Extremely short design – Extremely bright LED – Solid hold in any T-slot – Can be installed from above	
<b>Part number of the most common types</b>				
Connector versions M8x1 with rotary terminal nut and cable length of 30 cm				
PNP	Normally open	BMF 307K-PS-C-2-SA2-S49-00,3	BMF 235K-PS-C-2A-SA2-S49-00,3	
	Normally closed	BMF 307K-PO-C-2-SA2-S49-00,3	BMF 235K-PO-C-2A-SA2-S49-00,3	
NPN	Normally open	BMF 307K-NS-C-2-SA2-S49-00,3	BMF 235K-NS-C-2A-SA2-S49-00,3	
	Normally closed	BMF 307K-NO-C-2-SA2-S49-00,3	BMF 235K-NO-C-2A-SA2-S49-00,3	
<b>Cylinder profile</b>	<b>Example</b>	<b>Installation</b>		
 T-slot	General	Slide-in		Can be installed from above

## For compact sensors:

Supply voltage $U_b$	10...30 V DC
Ambient temperature range $T_a$	-25...+85 °C
Degree of protection as per IEC 60529	IP 67
Housing material	Plastic housing
Connection	Connector versions with M5, M8 and M12, cable versions (various lengths)
Approval	CE, UL

## Flush mount in the slot

- Profit from the highly compact design. Now sensors can be installed flush in the slot and virtually disappear in it.

## Flexible, simple installation

- BMF 307
  - Slides into the slot
  - These sensors are adapted to the slot design and provide perfect holding power.
- BMF 235
  - Can be installed in the slot from above.
  - These sensors can also be installed if sliding in from the end is not possible, such as when a cylinder cover is in the way.

### BMF T-slot sensors on round cylinders Mounting bracket suitable for BMF 307 and BMF 235

Piston dia. in mm	Mounting bracket
8...25	BMF 307-HW-73 -115
25...63	BMF 307-HW-73 -255
63...130	BMF 307-HW-73-460

# Sensors for Pneumatic Cylinders

BMF 204 and BMF 214

## BMF 204 and BMF 214 – the new standard for C-slots

more added value

Festo slot  
(BMF 204)

SMC slot  
(BMF 214)

The design is adapted exactly to the slot, the sensor can be inserted into the slot

→ "Rock-solid" hold in any C-slot

BMF 204 and BMF 214 have the same electronics and only have mechanical differences.

Flush-fitting, the sensor vanishes in the slot.

→ Can also be used in space-critical applications

Miniature design, extremely short

→ Optimum solution for every gripper and short-stroke cylinder

Extremely secure hold  
in any C-slot

# Sensors for Pneumatic Cylinders

Position detection with compact sensors for C-slot

<b>Weld immune with LED in connector, with metal housing</b>	<b>M12 connector with 30 cm cable</b>		<b>M12 direct connector</b>
PNP	Normally open		BMF 32M-PS-W-2-S4
<b>Temperature-resistant up to 105 °C, with metal housing</b>	<b>M8 connector with 30 cm cable</b>	<b>M8 direct connector</b>	
PNP	Normally open	BMF 305M-PS-C-2-SA4-S49	

### Weld immune

The series BMF 305M/315M/32M-..-W.. are suitable for extreme applications. Metal housing is resistant to weld spatter. Welding currents less than 25 kA do not cause the sensor to malfunction. The output state of the sensor is stored during AC welding.

### Temperature-resistant up to 105 °C

Reliable position detection, even at high temperatures.

### Special sensors for radially magnetized magnets

Axially magnetized magnets are used in virtually all pneumatic cylinders and grippers. Radially magnetized magnets are only used in exceptional cases, e.g. grippers manufactured by Schunk. Balluff offers special versions of the BMF 103 and BMF 303 in a white housing for clear identification.

Series	<b>BMF 303...SA7</b>	<b>BMF 103...SA7</b>

# BMF V-Twin – clever, low-cost connector concept

Two sensors, one connector

- ➔ Save time and reduce costs during installation.
- ➔ Low initial costs compared to two individual sensors:  
**BMF 204/214** approx. 20 % savings  
**BMF 303/305** approx. 30 % savings  
**BMF 307** approx. 35 % savings
- ➔ Space in the splitter box for twice as many sensors.

	4-pin M12 connector with 30 cm cable	4-pin M8 connector with 30 cm cable
